OBJECTIVE

To obtain a challenging Data Analyst/Data Scientist position utilizing my strong analytical skills, technical knowledge, and passion for solving complex problems through data-driven solutions. I am eager to contribute to a team-oriented environment while continuously learning and growing as a professional in the field.

TECHNICAL SKILLS

- **Microsoft Excel:** Proficient in utilizing Excel for data analysis, reporting, and project management. Skilled in a wide range of functions, including VLOOKUP, PivotTables, SUMIFS, and advanced formulas. Applied Excel extensively in various projects, demonstrating expertise in data manipulation, visualization, and problem-solving.
- **SQL (Structured Query Language):** Proficient in SQL, with hands-on experience in database management and analysis. Well versed in fundamentals, key functions, joins, subqueries, and window functions. Successfully applied these skills in projects to solve practical business problems, showcasing strong data manipulation and reporting abilities.
- **Tableau:** Proficient in Tableau for data visualization and business intelligence. Skilled in creating interactive dashboards and reports to convey data-driven insights effectively, enhancing decision-making processes.
- **Python:** Basic proficiency in programming languages like Python for data manipulation and analysis
- **Basic Statistics:** Understanding of basic statistical concepts and their application in data analysis.
- **Data Visualization Tools:** Familiarity with data visualization tools such as Tableau or Power BI for creating charts, graphs, and dashboards.

CERTIFICATION

- **DATA ANALYST**
